

VHENN IVHEL ANGELO L. NALES

FULL-STACK & MOBILE APP DEVELOPER

Lucena City, Quezon | +63 954 330 5828 | ibellddev179@gmail.com | [linkedin.com/in/ivhelnales](https://www.linkedin.com/in/ivhelnales) | knales179.github.io/portfolio-Nales/

PROFILE SUMMARY

Information Technology graduate with hands-on experience in full-stack web and mobile application development through internship, capstone work, and personal projects. Experienced in developing applications using React, React Native, Node.js, Express.js, MongoDB, TypeScript, and related technologies. Contributed to real-world transportation systems, including a mobile ride-hailing application and a web-based tricycle records management system. Experienced in frontend and backend development, database management, API integration, system testing, troubleshooting, and data management. A fast learner and adaptable developer seeking an opportunity to contribute technical skills while continuing to grow in a professional development environment.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript, SQL, Python
- Frameworks: React, React Native, Node.js, Express.js, Vite, Expo, NativeWind, Django
- Databases & Storage: MongoDB, MongoDB Atlas, MySQL, PostgreSQL, SQLite, AsyncStorage
- Tools & Platforms: Git, GitHub, Figma, Cloudinary, Render, Microsoft Office
- Core Skills: Full-Stack Development, Mobile App Development, Database Management, System Testing, Troubleshooting, UI/UX Design, Data Management, Cybersecurity Fundamentals

PROJECTS

TODA-GO Mobile — Tricycle Ride-Hailing and Dispatch Application

2025 - 2026

Capstone Project - Full-stack Developer

- Designed and developed a full-stack tricycle transportation platform consisting of a React Native mobile application for passengers and drivers and a web-based administrative system for transportation management.
- Designed the UI/UX and implemented core features including ride booking, location-based services, ride management, real-time communication, and administrative management of drivers, vehicles, franchises, and violations.
- Developed the backend APIs, database architecture, and system integrations, while collaborating with the TFRO through multiple presentations and consultations to gather requirements and translate their operational needs into functional system features.

TIRS — Tricycle Integrated Records System

2026

Intern - Full-stack Developer

- Designed and developed a full-stack web-based records and transaction management system for TFRO's tricycle regulatory operations.
- Designed the system UI/UX and implemented administrative workflows for managing driver, vehicle, franchise, violation, impoundment, enforcer, and transaction records.
- Developed backend APIs, database architecture, and document/image management functionality to support centralized transportation records and administrative operations.

EDUCATION

Bachelor of Science in Information Technology

Graduated 2026

Dalubhasaan ng Lungsod ng Lucena — Lucena City, Philippines

- Relevant Coursework: Object-Oriented Programming, Database Management Systems (PostgreSQL), Web Development (React & Django), Mobile Application Development (React Native), Data Analytics (Python & Jupyter Notebook), Network Security, Systems Analysis and Design

CERTIFICATIONS & AWARDS

- Networking Basics — Cisco — Dec. 10, 2025
- Ethical Hacker — Cisco — May 2, 2025
- Introduction to Cybersecurity — Cisco — Dec. 2, 2024
- Social Impact / Tech for Good Award — Capstone
- Most Improved Student — BSIT Department
- Research Presenter, DLL: Paghimay 2026 Research Congress
