PROFILE

Information Technology graduate with practical experience in web and mobile application development through internship and personal projects. Experienced in creating functional systems, managing data, troubleshooting technical issues, and working with various digital tools. A dependable and adaptable individual who enjoys learning new skills and solving problems, seeking an opportunity to contribute to a team while gaining further professional experience.

WORK EXPERIENCE

Full stack dev and mobile app (Intern) - Tricycle Franchising Regulatory Office

Lucena

Feb 2026 - April 2026

- Developed and improved TODA-Go, a mobile application for tricycle ride-hailing and transportation services.
- Developed TIRS, a web-based system for managing tricycle franchise and regulatory records.
- Built and integrated frontend, backend, database, and API features for both systems.
- Assisted with system testing, debugging, data management, and technical support.
- Worked with staff to identify requirements and improve system functionality.

Data Encoder (Freelance) - Royal Memberships

Dec 2025

- Encoded new members' information and updated existing records during a high-volume period.
- Validated entries for completeness (missing fields, duplicates, formatting consistency).
- Organized member lists for easier review and reporting.
- Followed confidentiality and data-handling instructions while working with personal information.
